## 📁 PROJECTS

**Quiz Management System** 🔗

- Teachers can try this project to create quizzes with a unique code.
- Only those students who enter the correct code are allowed to take the quiz.
- The system evaluates the quiz instantly and displays results.
- Any user can view the leaderboard of any quiz by entering its code. There is a contact form to take feedback from users.
- Tech Stack Used: **HTML5**, **CSS3**, **JavaScript**, **PHP** and **MySQL**.

**LezChat** 🔗

A chatting app that allows multiple users to come on a common platform and chat with each other. It shows the list of people who are present in the chat. It notifies the user when any other user joins or leaves the chat.

- **ExpressJS**, which is an application framework **NodeJS**, is used to write the server-side logic for the web application.
- Here **Socket.io** enables real-time, bi-directional communication between web clients and servers.
- For styling purposes, **Saas** is applied, which is a CSS pre-processor, and **Bootstrap 4**.
